Fiware Shared Services Platform

Cost Effective & Scalable Solution

FIWARE Platform

APIs (Application Programming Interfaces) that ease the development of Smart Applications in multiple vertical sectors

Solution Details

The FIWARE platform provides a rather simple yet powerful set of APIs (Application Programming Interfaces) that ease the development of Smart Applications in multiple vertical sectors. The specifications of these APIs are public and royalty-free. Besides, an open source reference implementation of each of the FIWARE components is publicly available so that multiple FIWARE providers can emerge faster in the market with a low-cost proposition.

Features

Fiware is a Shared Service Platform with following features:

Open Source Platform

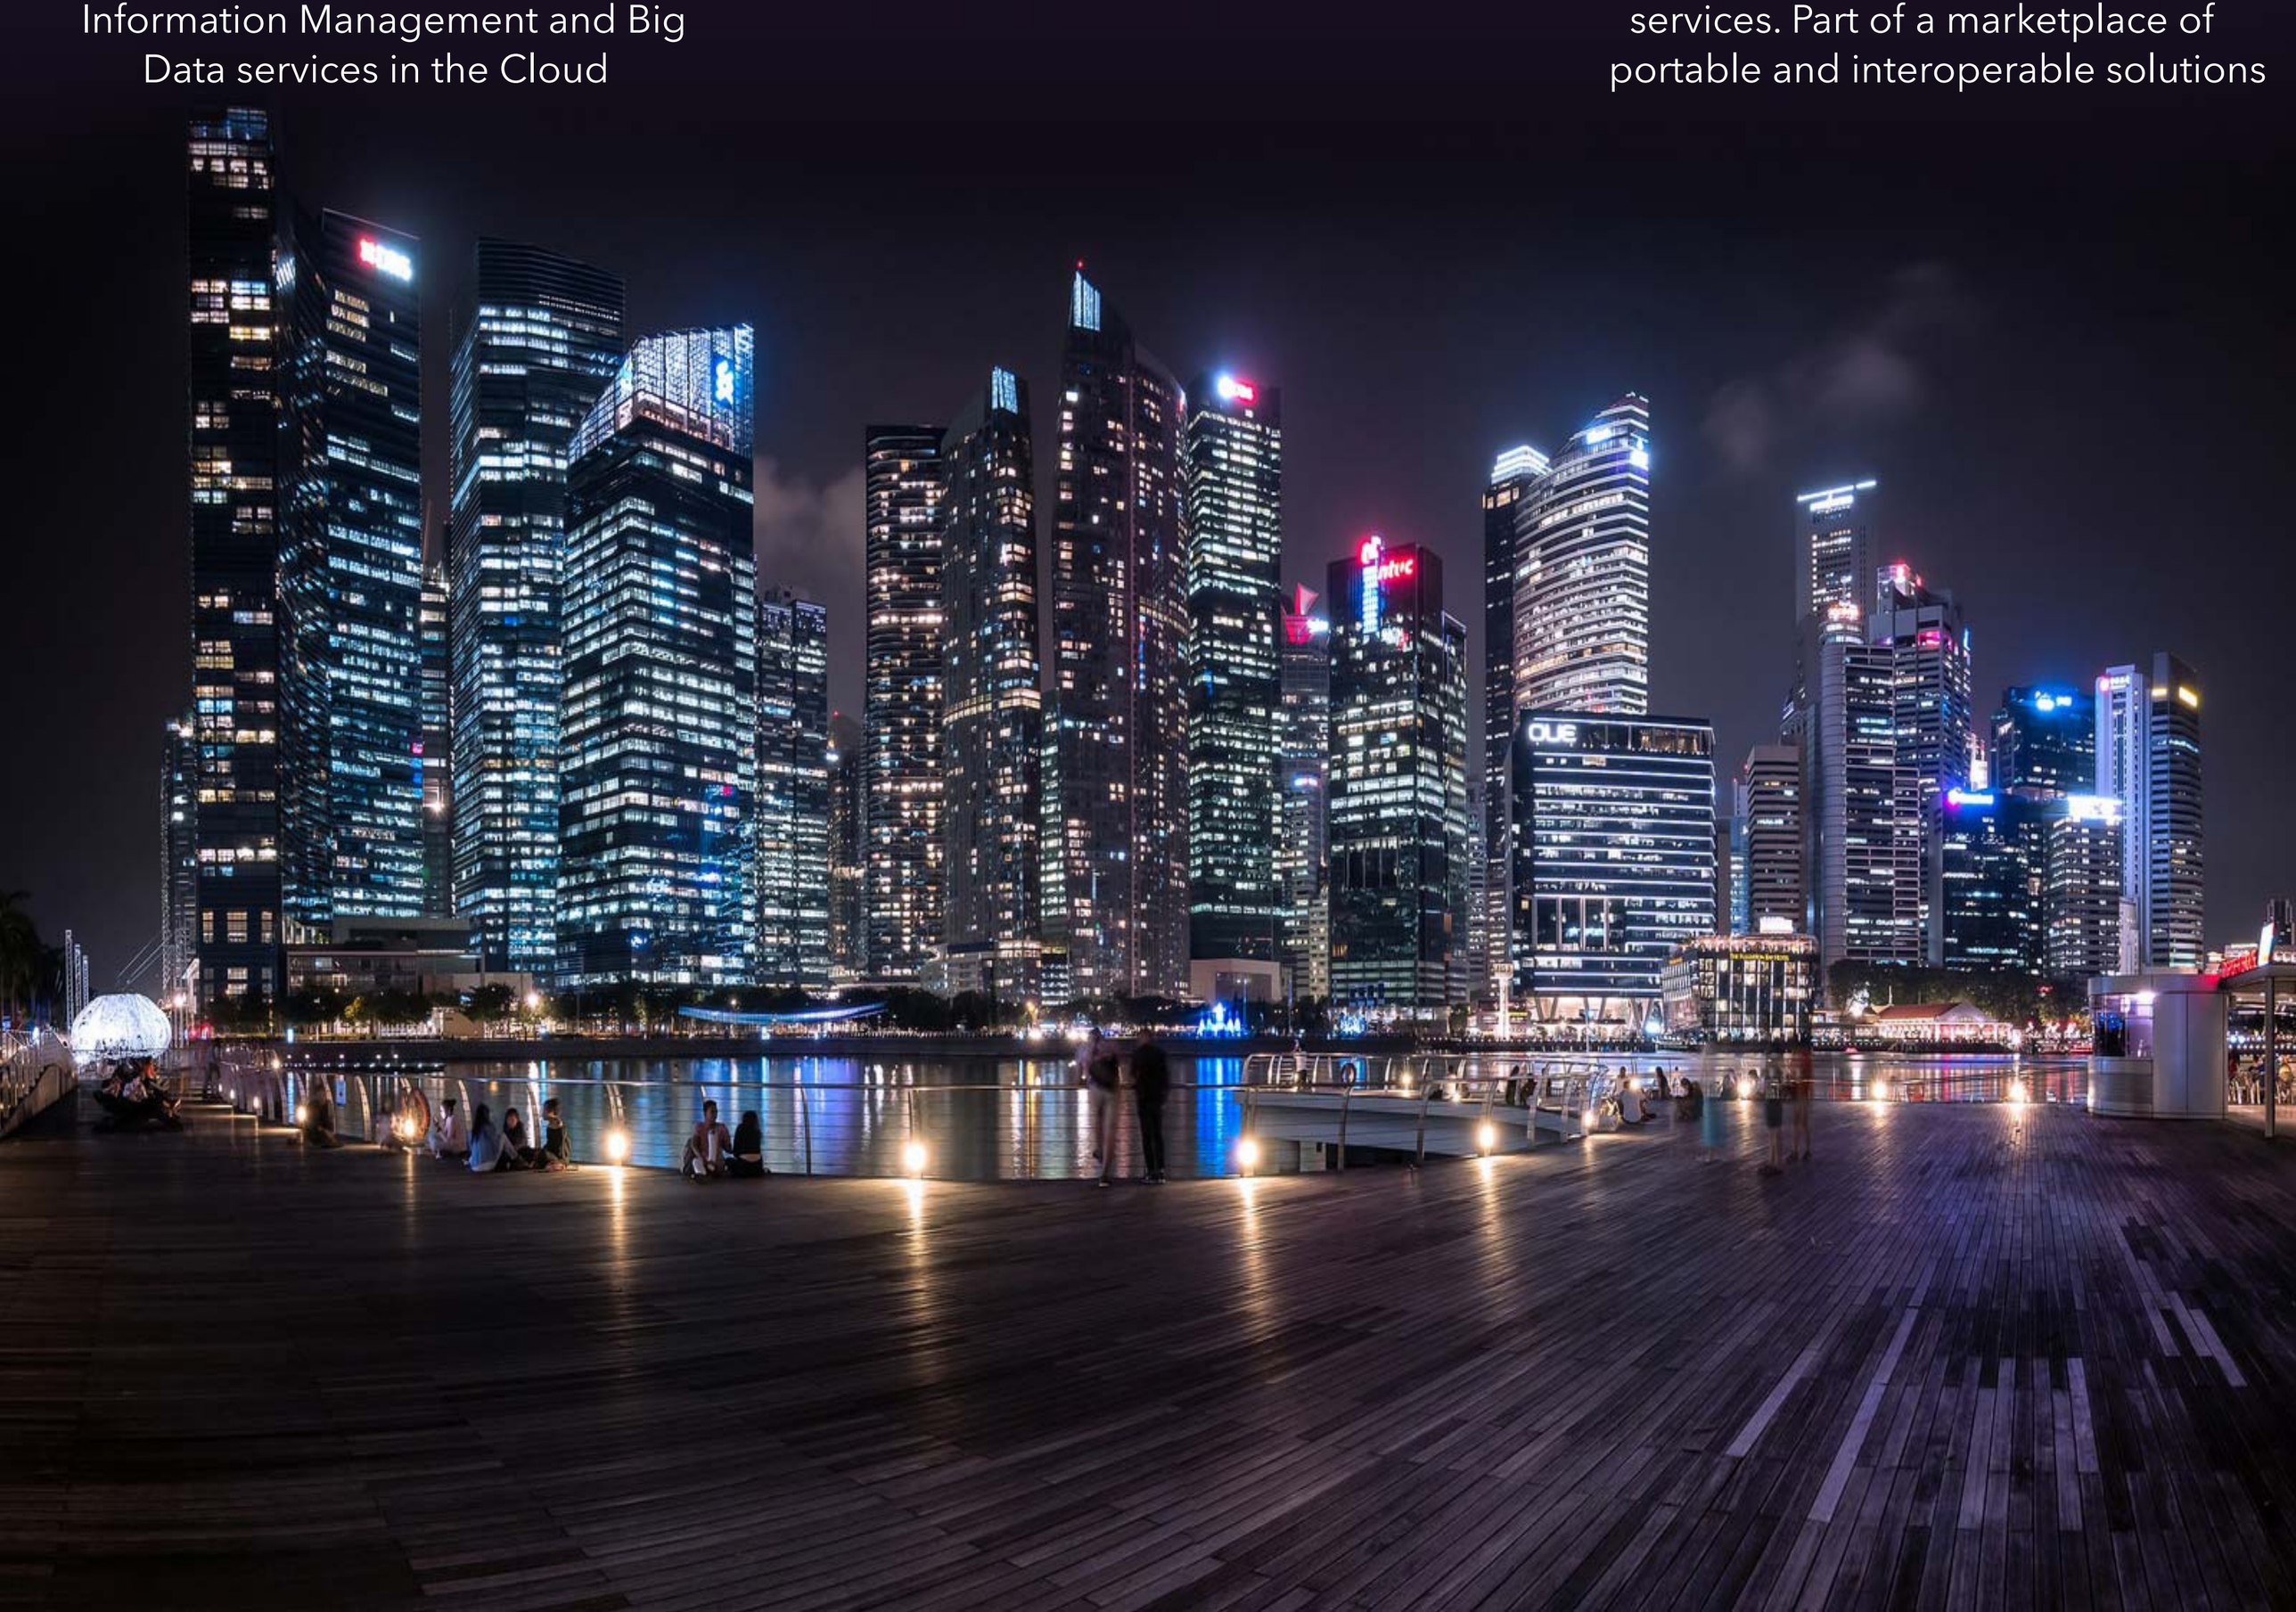
Open Source Platform market - ready open source software, combining components that enable the connection to IoT with Context Information Management and Big Data services in the Cloud

Smart Usage of Data

Smart Usage of Data - Standard APIs for data management and exchange, as well as harmonised data models

Smart Solutions & Services

Smart Solutions & Services - Automation of processes across the entire value chain. Easy plug & play integration with other solutions and services. Part of a marketplace of portable and interoperable solutions



Advantage of Fiware platform for Smart Cities

1.

No Cost

The basic software (Platform and Generic Enablers) is available for everyone, for free, for ever

2.

Smart Services

A large group of start ups and global corporate companies are providing smart solutions and smart services based on the open source technology

3.

Well Maintained

A large open source developer community is maintain and further developing the open source software components

4.

Ownership

Lowest cost of ownership for the cities

5.

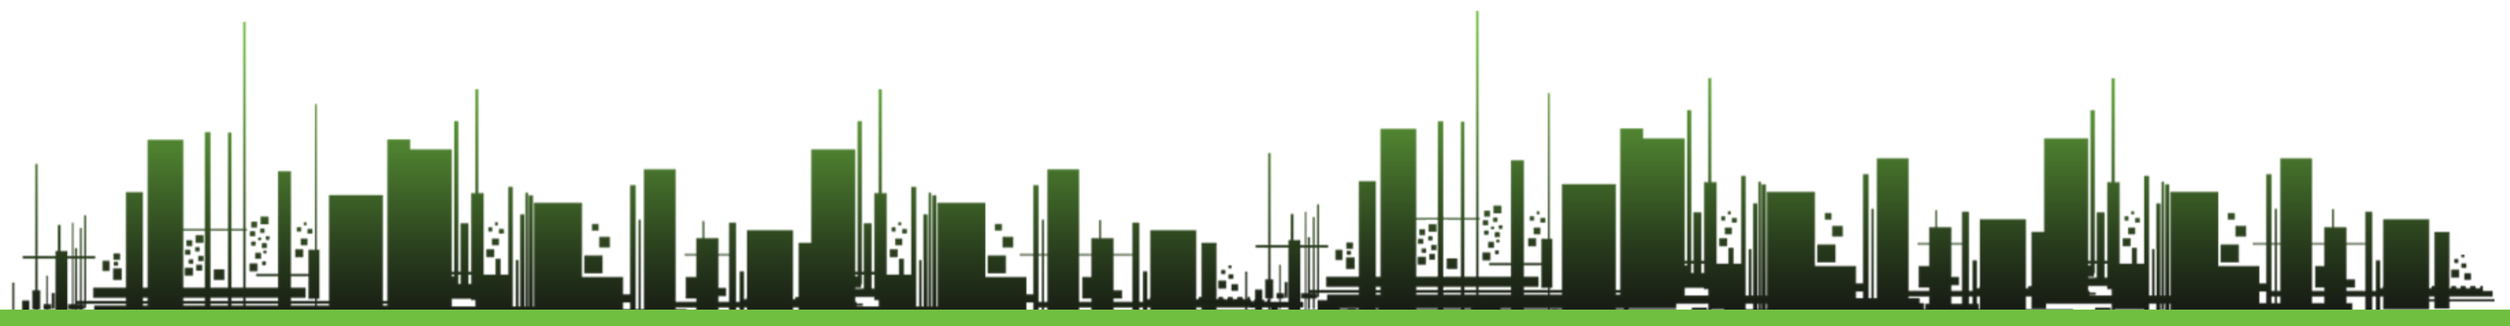
Vendor Lock

Open data models and open APIs are avoiding a, vendor lock in effect

6.

Secured

As secure as a closed source software solution



Fiware Shared Services Platform

Recommended for

APIs (Application Programming Interfaces) that ease the development of Smart Applications in multiple vertical sectors
